1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page 1, line 1, insert --This application is a Divisional of 09/940,984, filed August 29, 2001 now abandoned.--

2. The following is an examiner's statement of reasons for allowance:

The invention relates to a perfluorocompound decomposing apparatus which includes a perfluorocompound decomposing apparatus which decomposes perfluorocarbons resulting from semiconducting processing gases, an acid gas removal apparatus as well as gas suction apparatus for sucking the discharge gas in the acid gas removing apparatus by a jet stream of an injecting base thereby ejecting the gas and a mist separation apparatus for separating mists from the gas discharged from the acid gas removing apparatus by suction by the gas suction apparatus and a tank for receiving one of the water and aqueous alkaline solutions from the acid gas removing apparatus and a discharging piping leading the mists separated in the mist separating apparatus to the tanks are provided below the acid gas removing apparatus and the mist separating apparatus. The prior art fails to teach and/or suggest the apparatus as claimed specifically employing the gas suction apparatus or ejector as claimed which replaces the prior art's blower for moving the gas streams through the perfluorocarbon

apparatus. The replacement of the blower with the ejector is not obvious because the art fails to recognize, teach, suggest or provide any motivation for applicant's need to replace the blower which is the realization that acid mists from the scrubbers corrode the blower which impacts the entire semiconducting process, there was a long felt need to provide an suction apparatus which does not utilize blowers or devices which are suspect to acid corrosion, the ejector device provides the gas suction required for treatment of the perfluorocarbon apparatus and does not suffer the corrosion problems of the prior art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
